DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. No art has been applied to the claims because the scope of the invention is not clear.

The following phrases in the claims are vague, indefinite, and/or awkwardly and confusingly worded:

“a non-diamond portion....diamond particles are included” (claims 17 and 18, lines 11-12 and 13-14 respectively). The phrase is confusingly worded because diamond particles are included in a non-diamond portion.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3723

3. Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 1010318.

GB 318' discloses a diamond blade comprising all of the limitations of the above mentioned claims (Note figs. 3 and 5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 1010318.

GB 318' discloses as discussed above.

GB 318' does not disclose the specific arrangement of the diamond particles in the rim type cutting tip.

The specific arrangement of the diamond particles in the rim type cutting tip would have been obvious to one having ordinary skill in the art at the time the invention was made since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
